1ST SAUDI HYPOLEARN ITERATION

Hypospadias Hands On Simulation Course and Symposium

9-11 September 2025

King's College Hospital London - Jeddah

For Registration

Dear Colleagues and Participants,

It is with great pleasure and pride that we welcome you to the 1st Hypolearn Iteration Course in Saudi Arabia. This landmark educational initiative marks a significant step forward in advancing medical knowledge and clinical practice in our region.

The Hypolearn course is designed to offer a unique, interactive learning experience focused on excellence in hypospadias procedures. Through dynamic case discussions, expert-led sessions, and hands-on workshops, we aim to foster critical thinking and promote best practices that translate directly into patient care.

As the organizing committee, we are honored to collaborate with distinguished faculty, dedicated organizers, and enthusiastic participants like you, who are committed to continuous learning and professional growth. Your presence enriches this experience and contributes significantly to the course's success.

We hope this inaugural iteration will not only expand your clinical knowledge but also build lasting professional connections across our healthcare community.

Sincerely,

Dr. Hanan Said

TARGET AUDIENCE

SYMPOSIUM KEY LEARNING

1

Knowledge:

Gaps in hypospadias embryology, penile anatomy, classification, and operative selection.

2

Behaviour:

Inconsistent surgical decision-making, limited audit culture, and variable family communication.

3

Skills:

Deficient finesse in handling delicate tissues, fidelity in urethroplasty steps, and preservation of tissue vascularity.

4

Performance:

Incomplete preoperative assessment, weak operative documentation, and poor structured follow-up.
